

# FireGrid™ Inventory Management

*FireGrid Inventory Management is a cloud-based application that aids in asset management and provides visibility into fleet utilization. This comprehensive application enables efficient and effective management of historical detail applicable to aspects of your respiratory, connectivity, and PPE assets.*

## Benefits

- Ability to quickly locate assets, understand their current status, and all historic data associated with them.
- Instant sight into any past or future planned maintenance and testing associated with each asset.
- In-depth parts inventory tracking. Set up minimum stock quantities and alerts to ensure proper inventory thresholds are maintained and parts are there when you need them.
- Notice of any upcoming testing requirements to help manage resources and scheduling.
- Efficiently create, manage, and track work orders and all resources associated.
- Efficiently create, manage, and track purchase orders to understand current stock and incoming parts.

## Supported Assets

- Cylinder
- Facepiece
- SCBA
- Turnout jacket
- Turnout pants
- Boots
- Neck protection
- Gloves
